## TrendUp (TUP) White Paper

### 1. Overview

Welcome to TrendUp (TUP), an exciting new cryptocurrency that's all about empowering you—the community. Unlike other tokens that claim to be community-driven, TrendUp is putting the power back where it belongs: in the hands of the people who believe in the project. With innovative features like **HODL Voting**, **Democratic Voting**, and **General Voting**, TUP gives you the ability to directly influence the future of the token. TrendUp is here to set a new standard in the crypto space where YOU have real governance power!

### 2. Introduction

#### The Problem:

Too many cryptocurrencies claim to be community-driven, but in reality, decisions are often made by a select few. This undermines the very essence of decentralization that blockchain technology was meant to provide.

#### The Solution:

TrendUp (TUP) is changing the game by giving you the tools to govern, decide, and help shape the project's future. Through three powerful voting systems, **HODL Voting**, **Democratic Voting**, and **General Voting**, you get a true voice in the decisions that matter most. This ensures a thriving, decentralized ecosystem where every holder has a stake in the project's success. It's a community-first approach, and we're excited to embark on this journey with you!

### 3. Tokenomics

**Token Symbol:** TUP

**Total Supply:** 100 trillion

**Blockchain:** ERC-20 (Ethereum)

**Contract Address:** xxxxxxxxx

#### Token Distribution:

- **Burning:** 40% will be burned to reduce supply and increase scarcity, creating value for all holders.
- **Liquidity:** 5% allocated to Uniswap to help maintain market stability.
- **Development & Marketing:** 10% set aside to fund the growth and promotion of the project.

#### Transaction Fees:

- **Buy Fee:** 2% (1% to liquidity, 1% to team wallet)

- **Sell Fee:** 3% (1% to liquidity, 2% to team wallet)

#### **Fee Adjustments:**

The community has the power to adjust transaction fees through **General Voting**. The maximum fee limits are capped at 2% for buying and 3% for selling, but the community can lower or remove them entirely. The power to make these changes is in your hands!

## **4. How to Buy TUP**

Getting involved with TrendUp is easy! You can buy TUP by swapping ETH for TUP on **Uniswap**. We're also working on getting TUP listed on centralized exchanges to make it even easier for everyone to join the community and enjoy better liquidity.

## **5. Voting Mechanisms**

#### **HODL Voting:**

This unique feature allows the community to vote on temporarily restricting sales to ensure price stability. If 40% of holders vote to **HODL**, selling will be restricted for 30 days, but purchasing will continue as usual. It's a great way to keep things stable and avoid sudden market fluctuations.

- **Voting Expiry:** Each vote lasts for 7 days, ensuring decisions are made in a timely manner.
- **Dead Wallets:** are not accountable for any voting holders only.
- **Democratic Voting:**  
Want to influence the future of the token's sale limits? With **Democratic Voting**, you can vote to change sale limits—currently set at 10% of total holdings per user per day. If 50% of holders agree, the cap can be increased to 100%. This gives the community the power to make the token's structure more flexible.
- **Voting Expiry:** Same as HODL Voting and General voting—7 days to reach a decision.

#### **General Voting:**

This broad system lets you propose and vote on a variety of operational matters, from tokenomics to transaction fees, and beyond. Your vote matters, and every decision impacts the future of TrendUp.

## **6. Key Features of Voting Mechanisms**

- **HODL Voting:** A tool for ensuring price stability by temporarily restricting sales when needed by the holders.
- **Democratic Voting:** Empower the community to adjust sale limits and make important decisions on token economics by the holders.
- **General Voting:** An inclusive platform where all holders can have their say on various project aspects as there's more to come.

### **Voting Power:**

Your influence is directly tied to the amount of TUP you hold. When you hold TUP, your voice is stronger, and you have more say in the direction of the project. If you sell or transfer tokens, your voting power adjusts accordingly. All votes are verified through etherscan.

## **7. Advanced Features for Stability & Fairness**

TrendUp is designed for long-term growth, market fairness, and stability. We've incorporated advanced features to protect the project from market manipulation and ensure that everyone involved can participate in a fair environment. Think of TrendUp as a next-gen crypto ecosystem—a self-driving vehicle built to prioritize safety and stability, ensuring you're on a smooth and rewarding ride. It's optimized for steady growth rather than quick gains, and it's designed to be safer, smarter, and more sustainable for all participants.

## **8. Conclusion**

TrendUp (TUP) is here to offer something truly special: a cryptocurrency driven by YOU, the community. Through **HODL Voting**, **Democratic Voting**, and **General Voting**, you're not just a holder—you're a decision-maker. This decentralized approach to governance is at the heart of everything we do, and it's what sets TrendUp apart in the crypto world. Together, we're building something that will stand the test of time—a project where every voice matters and everyone has a chance to shape the future.

Join us in making TrendUp the next big thing in the world of decentralized finance. The future of crypto governance starts here, and we can't wait to grow alongside you!
